Software engineer

EXPERIENCE

Software engineer intern

Infobip

April 2024 - August 2024 - 5 months, Slovakia

As a Software Engineer Intern at Infobip in Slovakia, I contributed to the development and optimization of backend services. I collaborated with a cross-functional team to design and implement features that enhance user experience. I gained hands-on experience with various technologies and tools, improving my programming skills and understanding of software engineering principles.

Self-development

September 2022 - Present

Transport Company Simulation in Košice (JavaScript, NodeJS, SQL)

Simulated operations of a transport company, including logistics and resource management.

Medical AI Assistant (Python, React, TypeScript, Redux)

Built an AI-powered assistant for the medical field.

Console games (C, C#)

Developed text-based games.

Various websites (HTML/CSS/JavaScript/TypeScript)

Commercial project for internal users (React, TypeScript, Redux, Node.js, SQL, .NET)

Created a commercial web application for internal users of a large company to streamline business processes.

EDUCATION

Faculty of Electrical Engineering and Informatics

Computer Science

Technical University of Kosice - Kosice, Slovak Republic

2022 - Present
