## SUMMARY

---

As a Fullstack Developer with nearly two years of experience in C#/.NET and React, I have a strong foundation in building web applications and interactive user interfaces. As a Software Engineer at Infobip in Slovakia/Croatia, I honed my backend skills, working on optimizing services and collaborating with cross-functional teams to create user-centered features. My hands-on experience with diverse tools has enhanced my programming skills and software engineering knowledge. I'm eager to take on new challenges, grow as a developer, and make a positive impact on each project.

## SKILLS

---

### Technologies

Front-End: JavaScript, TypeScript, ReactJS, Redux, Redux Toolkit, HTML/CSS

Back-End: C#/.NET, Python, ASP.NET Core, Node.JS, Entity Framework, SQL, Docker, OAuth, REST API
